East Haddam Community Fiber Network Benefits

An automated open access® fiber to the premise network that empowers communities to empower their citizens.

- Connectivity for ALL!

- Ultra fast reliable internet connection.

- Uninterrupted and reliable K-12 and distance learning.

- Freedom of choice: Multiple ISPs.

- Affordable long-term price stability.

- Enhanced emergency communications and future Town services.

- Increased security with the ability to create private networks.

Future proof your community and enhance your economy!

Infrastructure Managed as a Community Network

Water

Sewer

Electricity

Broadband

Is Broadband Connectivity Essential?

Nature of a Community Infrastructure

1 **Ubiquitous Access and Reliability**

2 **Affordable with Long-Term Pricing Stability through an open marketplace**

3 **Enhanced Emergency Communications and Security**

Private vs. Public Infrastructure

Private Infrastructure
A private network is designed and operated with a focus on providing service where it is most profitable.

Public Infrastructure
A community network is designed to deliver the maximum level of service for the minimum price to every home and business.

Private Network Infrastructure

If Today's Road Systems Worked Like Current Incumbent Broadband Networks
Closed | Private Infrastructure
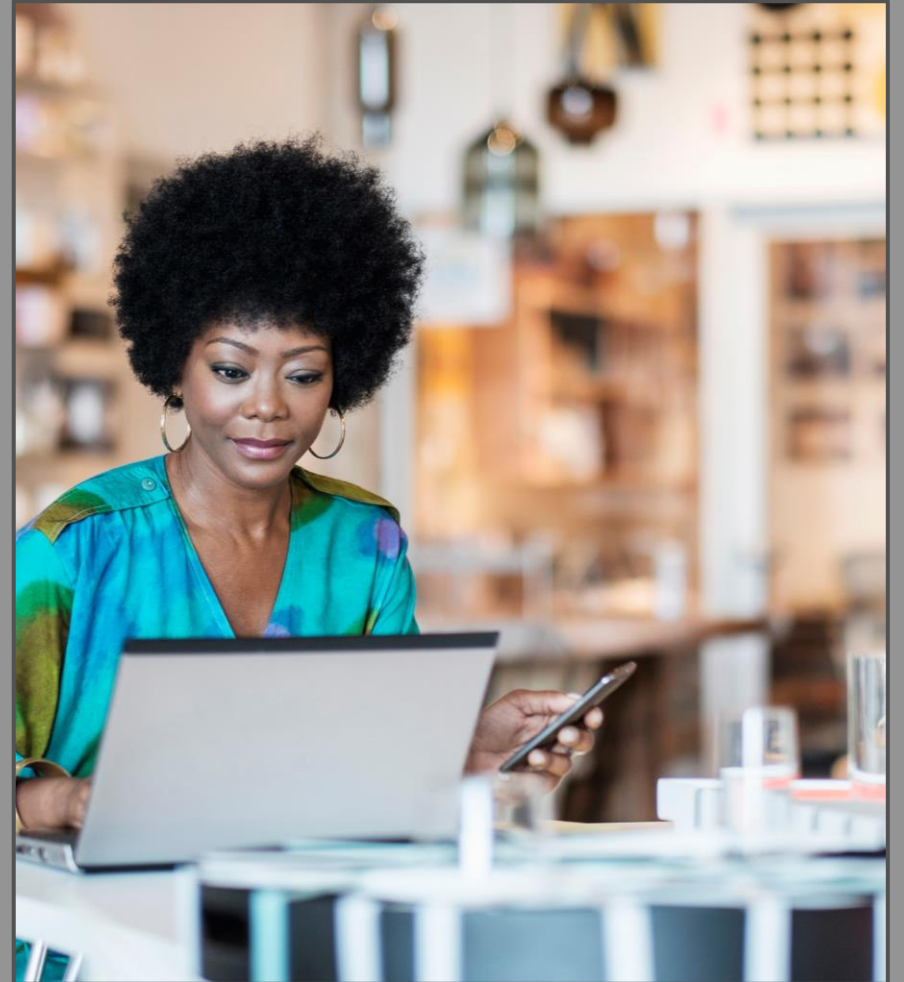

Public Network Infrastructure

Open Broadband Infrastructure
Open | Public Infrastructure
